RATE

The customers under this rate schedule shall be subject to a monthly customer charge, and a distribution charge.

The rate information is detailed in the Rate Summary pages of this tariff.

The Customer Charge will be determined based upon the Customer's actual throughput quantities, including sales and distribution, measured in therms (thms), for the most recent twelve-month period ended October 31. If a Customer does not have sufficient consumption history to determine its customer charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the Customer to submit estimated annual gas requirements, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the Customer's estimate where necessary. A customer's customer charge will remain constant annually, subject to change January 1 of each year. (C)

In all cases, the Company reserves the right to review the customer charge and, upon receipt of satisfactory proof, to adjust the customer charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

The applicable distribution charge for all distribution quantities shall be determined based upon the Customer Charge group in which the Customer is placed, as established annually above. (C)

The distribution rates may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

The Company shall give the customer 2 hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.
