

Save Energy & Money

WITH OUR ENERGY EFFICIENCY PROGRAMS

Online energy audit & kit program

Learn how simple changes around your home can lead to energy savings. **Complete our online energy audit** and you could receive an energy efficiency kit with easy to install measures designed to help you save, **all at no cost to you.**¹

Go to ColumbiaGasPA.com/Kit2025 to get started.

¹Available only to Columbia Gas of Pennsylvania Customers who have completed the Online Home Energy Audit. Customers who primarily have natural gas heat will receive an energy efficiency kit that contains 10 switch and outlet insulation gaskets, one tube of caulk and one can of foam sealant. Customers who have natural gas water heating will receive an energy efficiency kit that contains one kitchen faucet aerator, two bathroom faucet aerators and two high-efficiency showerheads. Qualifying customers can receive only one of each type of energy efficiency kit. Qualifying customers can return to update their home profile to receive the other energy efficiency kit.

Upgrade and Save

Energy efficiency rebates available!

Residential customers can offset the cost of upgrading to qualifying energy-saving measures including furnaces, boilers, combi-boilers, gas fired heat pumps, tankless water heaters, smart thermostats and insulation & air sealing. It's easy – just submit your paid contractor invoice via the rebate application online or by mail once your new measure is installed.²

Visit ColumbiaGasPA.com/Rebates2025 for more information.

² Available rebates are for new measures (not refurbished or used) in the original packaging, must be replacements of existing equipment and must be purchased and installed at the Account Owner's service address by a qualified contractor doing business in the applicable field (e.g., insulation installer, plumber, HVAC technician, or electrician) with the exception of a smart thermostat which can be installed by Owner. Insulation Rebates must include both insulation and air sealing measures in order to qualify for a rebate. New construction and additions to a home's square footage do not qualify for rebates. Primary heat source for installed measures must be natural gas. Rebate quantities are limited and are approved on a first come first served basis. Rebates are not guaranteed. The rebate application must be received within 120 days of purchase and installation or by December 31, 2025, whichever is sooner.
