

IMPORTANT NOTICE TO NATURAL GAS SERVICE LINE INSTALLERS REGARDING CHANGES TO COLUMBIA GAS OF PENNSYLVANIA POLICIES

Monday, November 12, 2012

1) The distribution companies of Columbia Gas have approved high density polyethylene (HDPE) plastic pipe for new and replacement pipeline installations.

HDPE will be utilized in addition to the existing yellow medium-density plastic (MDPE).

In the attached document entitled, "Plumbers Notification" you will find pertinent information regarding the use and installation of HDPE.

As with any implementation of new materials, we anticipate that there will be a time period of adjusting to this change. Therefore, if you are unsure of what material to install (MDPE or HDPE) for any given project, please be sure to contact Columbia Gas for guidance.

New Business Team contact number is 1-800-440-6111

Customer Contact numbers:

PA – 1-888-460-4332

2) Update to the Standards For Customer Service Lines, Meters, and Service Regulators (Plumber's Guide) and the Materials for Customer Service Lines (MCSL) Manuals

The Plumber's Guide (PG) has been revised and issued October 10, 2010.

There has also been a supplement added to the MCSL. Central Plastics factory-assembled flex risers are now approved, and the supplement lists the part numbers.

Both the PG and MCSL Supplement have been posted to the CPA websites under the respective plumber information pages.
